Price & Label Guns with Universal Labels Price Marking > Coding > Dating

Smart & Printex Come to Canada! Price Marking > Coding > Dating

Canada is excited to finally get the Smart & Printex lines of labellers & price guns, and universal adhesive labels. Printex is an Italian company that has long been known for its quality, dependability, and design in Europe and the Middle East.

About Smart & Printex Labellers:

- Fast and easy loading of labels
- 2 year warranty
- Lightweight, ergonomic design and simple operation
- 8 band open code dater has universal date layout, can be YYYYMMDD or DDMMYY
- Standard 7 bands offer more flexibility than the 6 bands, can be \$0.00 or 0,00\$
- Universal adhesive labels for all temperatures -30 $^\circ C$ to 80 $^\circ C$

- European quality, made in Italy
- All labellers are sold as starter kit, includes labeller and ink roll, 10 rolls of labels, 1 replacement ink roller great value!
- Made of durable, high quality engineered polymer frame
- Unexposed label rolls prevent the labels from being crushed or contaminated
- Snap in/out ink roller means no messy replacement
- Self correcting feed mechanism, virtually jam-proof

Perfect for Any Industry

Our labellers are widely used in many industries such as retail, manufacturing & food preparation. They are perfect for small or large business operations and can be used to supplement current product labelling with a best before date, code number, or price. You can also reinforce your brand by printing your company name on every label! These label markers can also be used as a backup to automated marking systems, enabling you to continue production, saving time and money during downtime.

How to reload labels - Printex only

1. Open the bottom assembly by sliding the two side locks back. You may have to press the handle for it to open.

2. Now open the top label cover by pulling up. Feed a strip of labels straight down the middle of the labeller so that it comes out the botton, making sure that the label is facing forward/up. Drop the roll into the top and close the label cover.

Pull an 8" strip of the labels out from the labeller and close the bottom assembly until it snaps.
 Feed labels straight down into the bottom drive assembly. Now squeeze the labeler handle to advance the strip of labels through the bottom assembly. It may stick a bit at first, but within a few cycles, the labeller will align itself to print in the proper area of the label.

How to reload labels - Smart only

1. Open the bottom assembly by pulling up on the rounded end.

2. Now open the top label cover by pulling up on it.

3. Feed a strip of labels straight down the middle of the machine so that it comes out the botton, making sure that the label is facing forward/up. Put the roll on the roll holder and close the label cover. Pull an 8" strip of the labels out from the labeller.

4. Close the smaller back bottom assembly first, then with the labels running straight back, snap close the larger bottom assembly. Squeeze the labeller handle to advance the strip of labels through the bottom assembly. The handle may stick a bit at first, but within a few cycles, the labeller will align itself to print in the proper area of the label.

How to set the print impression

1. Move the indicator marker to the position you desire to change by pulling the setting knob out to the right.

2. The white portion of the band must be visible in the display window (not the dark negative side).

3.After setting the characters, the knob must be returned to the print position by pushing it all the way left.

How to change the print calibration

 Gently loosen the screws on both sides of the print head.
 Move the print head forward or back as needed to make the print location higher or lower on the labels.
 Tighten screw.

How to change ink roll

 When changing the ink roll, you should wear rubber gloves to avoid getting ink on your hands or work area. Do not work over material you would not want ink on.
 Access the ink roller by opening the front door. For Smart labeller, pull the front door down and out (A). For Printex labeller, pull the front door up and out (B).
 Pinch the sides of the roller and forcefully pull the ink roll out to unsnap it. For Smart pinch the sides of the roll (C), for Printex pinch the clips (D). For an easier release, unsnap one side at a time with a twisting motion. Dispose of the used ink roller.
 Snap the new ink roll into the label labeller and close the front door.
 Never re-ink an ink roller. The rollers are not designed to absorb ink and will drip ink inside your labeller and damage it.
